

附件一：呼特康 125/5 微克加壓驅動懸浮吸入劑 (衛部藥輸字第 026345 號) 外盒及仿單變更前後對照示意圖

項目 外盒	舊	新
	 <p>The old packaging design for Flixotide inhaler features a white box with orange and pink accents. The top flap has a barcode and the text '125 microgram/5 microgram per actuation, pressurised inhalation, suspension'. The front panel displays the product name '呼特康' and '125/5 微克' in large characters. Below this, it states '125 microgram/5 microgram per actuation, pressurised inhalation, suspension'. The ingredients are listed as 'fluticasone propionate/formoterol fumarate dihydrate'. The bottom flap has a barcode and the text '120 actuations for inhalation use'.</p>	 <p>The new packaging design for Flixotide inhaler features a white box with orange and pink accents.
